

Table of Contents

Southern United States Soybean Disease Loss Estimates for 2013

S. R. Koenning

North Carolina State University 1

Association of *Phomopsis longicolla* and *Macrophomina phaseolina* with zone lines in soybean roots at maturity

M. L. Zaccaron, J. C. Rupe, and R. T. Holland

Department of Plant Pathology, University of Arkansas, Fayetteville, AR 72701 8

A Molecular Phylogenetic Redefinition of *Cercospora kikuchii*S. Albu¹, P. Price², V. Doyle³ and R. Schneider¹¹ Department of Plant Pathology and Crop Physiology, Louisiana State UniversityAgricultural Center, Baton Rouge, LA, ² Macon Ridge Research Station, Louisiana StateUniversity Agricultural Center, Winnsboro, LA and ³ Department of Biological Sciences,

Louisiana State University, Baton Rouge, LA 9

The effects of salinity on *Pythium* rot of soybean

T. J. Stetina, C. S. Rothrock, and J. C. Rupe

Department of Plant Pathology, University of Arkansas, Fayetteville, AR, 72701 10

Distribution of *Cercospora sojina* and sensitivity to QoI fungicides in Mississippi soybean fields.

J. STANDISH (1), M. Tomaso-Peterson (1), T. W. Allen (2), S. Sabanadzovic (1), N.

Aboughanem-Sabanadzovic (3) (1) Mississippi State University, Mississippi State, MS;

(2) Mississippi State University, Stoneville, MS; (3) Institute for Genomics, Biocomputing &

Biotechnology, Mississippi State University, Mississippi State, MS. 11

Effect of crop rotation, location and isolation temperature on *Pythium* spp. population composition in Arkansas.

K.E. Urrea (1), J.C. Rupe (1), C.S. Rothrock (1), M.I. Chilvers (2), and J.A. Rojas (2). (1)

University of Arkansas, Fayetteville, AR, USA. (2) Michigan State University, East Lansing,

MI, USA. 12

Soybean Cultivars and Fungicide Responses to Frogeye Leaf Spot – Ten Years of Field DataHeather M. Kelly¹, William J. Jordan¹, and Melvin Newman¹¹University of Tennessee, Jackson, TN, 38301, USA 13

Observations on Soybean Rust and Soybean Vein Necrosis Virus in Alabama in 2013.

E. J. Sikora, K. Conner, D. Delaney, L. Zhang and M. Delaney

Alabama Cooperative Extension System; Auburn University. 14

Importance of kudzu as a reservoir for soybean viruses: preliminary dataN. Aboughanem-Sabanadzovic¹, W.F. Moore², T. Allen³ A. Lawrence⁴ and **S. Sabanadzovic**²¹ Institute for Genomics, Biocomputing and Biotechnology, Mississippi State University,
Mississippi State, MS 39762, USA² Department of Biochemistry, Molecular Biology, Entomology and Plant Pathology,
Mississippi State University, Mississippi State, MS 37759, USA³ Delta Research and Extension Center, Mississippi State University, Stoneville,
MS 38776, USA⁴ Institute for Imaging and Analytical Technologies, Mississippi State University,
Mississippi State, MS 39762, 15**Management of Cercospora Leaf Blight of Soybean with Foliar Applications of Iron**E. C. Silva, A. K. Chanda, T. Garcia Aroca, C. L. Robertson, E. Tubaña, B. Ward, S. Albu
and R. W. SchneiderDepartment of Plant Pathology & Crop Physiology, Louisiana State University Agricultural
Center, Baton Rouge, LA 70803. 16**Late Fungicide Applications to Manage Frogeye Leaf Spot in the Mississippi Soybean
Production System**Allen, T.W. ¹, Wilkerson, T. H. ¹, Irby, J. T. ², and Golden, B. R. ¹¹Mississippi State University, Delta Research and Extension Center, Stoneville, MS²Department of Plant and Soil Sciences, Mississippi State University, MS 17**Development and Optimization of a Weather-based Disease Advisory for Soybean**

H.L. Mehl and P.M. Phipps

Virginia Tech Tidewater Agricultural Research and Extension Center. 18

An Encounter with Target Spot and its Management with Fungicides

R. W. Schneider, C. L. Robertson, E. Chagas Silva and B. Ward

Department of Plant Pathology & Crop Physiology

Louisiana State University Agricultural Center, Baton Rouge, LA 70803 19

Cercospora Leaf Blight of Soybean: Latent Infection and Symptom Development

Ashok K. Chanda., Zhi-Yuan Chen, Eduardo C. da Silva, and Raymond W. Schneider

Department of Plant Pathology & Crop Physiology

Louisiana State University Agricultural Center, Baton Rouge, LA 70803 20

**Effect of Long-term Potassium Fertilization Rate on Sudden Death Syndrome,
Cercospora Leaf Blight and Frogeye Leaf Spot of Soybean.**

J.C. Rupe¹, N.A. Slaton², R.T. Holland¹, M.L. Zaccron¹, R. DeLong², A.J. Steger²

¹Department of Plant Pathology

²Department of Crop, Soils, and Environmental Sciences

University of Arkansas, Fayetteville, AR 21

Sensitivity of *Meloidogyne incognita* and *Rotylenchulus reniformis* to fluopyram

Travis Faske and Katherine Hurd

Lonoke Research and Extension Center, University of Arkansas, Cooperative

Extension Service, Department of Plant Pathology, Lonoke, AR 22

Reniform nematode influence on soybean production in Louisiana

C. Overstreet, E. C. McGawley, D. M. Xavier, and M. T. Kularathna

LSU AgCenter, Dept. of Plant Pathology and Crop Physiology, Baton Rouge, LA 70803 23

Rhizoctonias associated with soybean in the Southeast United States

C. S. Rothrock, S. A. Winters, and T. N. Spurlock

Department of Plant Pathology, University of Arkansas, Fayetteville, AR, 72701 24

Table of Contents

Schedule.....	5-8
Southern United States Soybean Disease Loss Estimates for 2014.....	9-14
Effect of Secondary Nutrient Applications on Suppression of Charcoal Rot in Soybean.....	16
Molecular Characterization of the G143A Mutation Leading to QoI Fungicide Resistance among Fungal Pathogens Causing <i>Cercospora</i> Leaf Blight and Purple Seed Stain on Soybean	17
The Effects of Starter Fertilizer on Soybean Infected with <i>Fusarium virguliforme</i> or <i>Rhizoctonia solani</i>	18
Root-knot Nematodes (<i>Meloidogyne</i> spp.) Associated with Soybean in Arkansas	19
Tillage, Fungicide, and Cultivar effects on Frogeye Leaf Spot Severity and Yield in Soybean	20
Frogeye Leaf Spot Response to Solo and Combination Fungicides.....	21
A New Perspective on <i>Cercospora</i> Leaf Blight Symptoms on Soybean	22
Using a Hill Plot Technique for Evaluating Soybean Varieties for Resistance to Sudden Death Syndrome..	23
Soybean Disease Management Issues in Louisiana During 2014	24
Soybean Vein Necrosis Virus in Mississippi.....	25
Monitoring for Soybean Vein Necrosis Virus in Alabama (2014).....	26
Challenges and Opportunities in the Use of Molecular Tools to Detect Strobilurin/QoI Fungicide Resistance: the Case of Frogeye Leaf Spot.....	27
Evaluating the Resistance of Some Soybean Cultivars on Reniform Isolates from Louisiana	28
Investigating Fungicide Sensitivities Beyond the QoIs in <i>Cercospora sojina</i> from Mississippi	29
Using Fluopyram as a Seed Treatment to Reduce Sudden Death Syndrome in Resistant and Susceptible Soybean Varieties	30
Glyphosate Affects <i>Cercospora</i> Leaf Blight and Brown Spot on Soybeans.....	31
Efficacy of Seed Treatments for Management of <i>Fusarium virguliforme</i> and <i>Heterodera glycines</i>	32
Minor Element Application as a Management Strategy for Soybean Rust and <i>Cercospora</i> Leaf Blight.....	33
Managing Frogeye Leaf Spot and Determining the Impact of Fungicide Phytotoxicity in Mississippi Soybean.....	34
An Update of Research on Phomopsis Seed Decay in Soybean.....	35

Table of Contents (continued)

Assessment of Several Commercially Available Triazole and Premix Fungicides for Management of Frogeye Leaf Spot in Arkansas 36

ILeVO® Seed Treatment for Control of SDS and Nematodes in Soybeans 37

Use of Random Point Assignments to Determine the Impact of Sudden Death Syndrome and Other Soilborne Diseases..... 38

Effect of Planting Date, Planting Density, Seed Treatment, and Seed Quality on Soybean Stand and Yield in Arkansas..... 39

Treasury Report 40

2014-2015 Officers 41
